TERRALINE
Consulting Engineers

Company Profile

Terraline Consulting Engineers

Highway, Transport &
Geotechnical Engineering Partner

Outsourcing • Sub-consultancy • Project Delivery Support

COMPANY OVERVIEW

- Ethiopia-based engineering firm specializing in highway and transport infrastructure.
- We operate as a capacity-enhancing partner to consultants, contractors, government agencies, and developers.

Core technical focus:

- Highway & Road Design
- Traffic Engineering & Road Safety
- Geotechnical Engineering
- Hydraulics & Drainage
- Construction & Technical Delivery Support

Vision & Mission

To be a trusted Ethiopian partner for safe, durable, and cost-effective road infrastructure

To strengthen project outcomes through disciplined engineering production and QA/QC-driven delivery systems.

VALUE PROPOSITION

TERRALINE help partners deliver projects faster and with fewer quality risks by providing

- Structured Workflows and Internal Technical Review
- Clear Documentation
- Flexible Engagement Model
- Delivery Focused Leadership

SERVICES

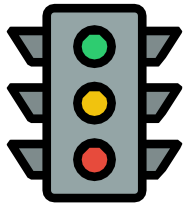
We provide services across the highway and transport project lifecycle. Output can be delivered as standalone work packages or as part of a sub-consultancy arrangement.

TERRALINE
Consulting Engineers

SERVICES

Highway Engineering and Road Design (HERD)

- Highway Geometric design (rural and urban roads)
- Pavement design (flexible and rigid)
  Intersection/interchange concept support
- Quantity take-off (QTO) and BoQ support
- Tender drawings, specs, and IFC documentation
- As-built drawing preparation and design updates



TRAFFIC ENGINEERING AND ROAD SAFETY (TERS)

- Traffic counts and basic traffic analysis support Traffic impact assessment support (site access, junction concepts)
- Road safety audits (design-stage and existing- road audits)
- Signing/marking concept support and safety
- improvement prioritization

SERVICES

GEOTECHNICAL ENGINEERING (GE)

- Soil investigation data interpretation
- Subgrade evaluation and classification
- Settlement, bearing capacity calculations, and slope stability analysis
- Geotechnical reporting support and earthworks analysis

HYDRAULICS AND DRAINAGE (HYD)

- Highway drainage concept and detailed design support
- Culvert hydraulic analysis support
  Catchment/hydrology analysis
- Flood risk screening support (pre-feasibility)

SERVICES

CONSTRUCTION SUPERVISION AND TECHNICAL DELIVERY SUPPORT (CSS)

- Construction methodology review and compliance checks
- Site support calculations and engineering clarifications
- Variation order technical support and
- measurement support
- Progress documentation support

FEASIBILITY AND PROJECT MANAGEMENT SUPPORT (PM)

- Feasibility study support (technical options, constraints, preliminary quantities)
- Tender preparation support and bid evaluation technical support
- PMO-style reporting (schedule/cost/risk
- registers)
- Transport/logistics planning support for freight access, site circulation, and corridor bottlenecks

WHO WE SERVE?

Government & City Authorities

Contractors and Consultants

NGOs

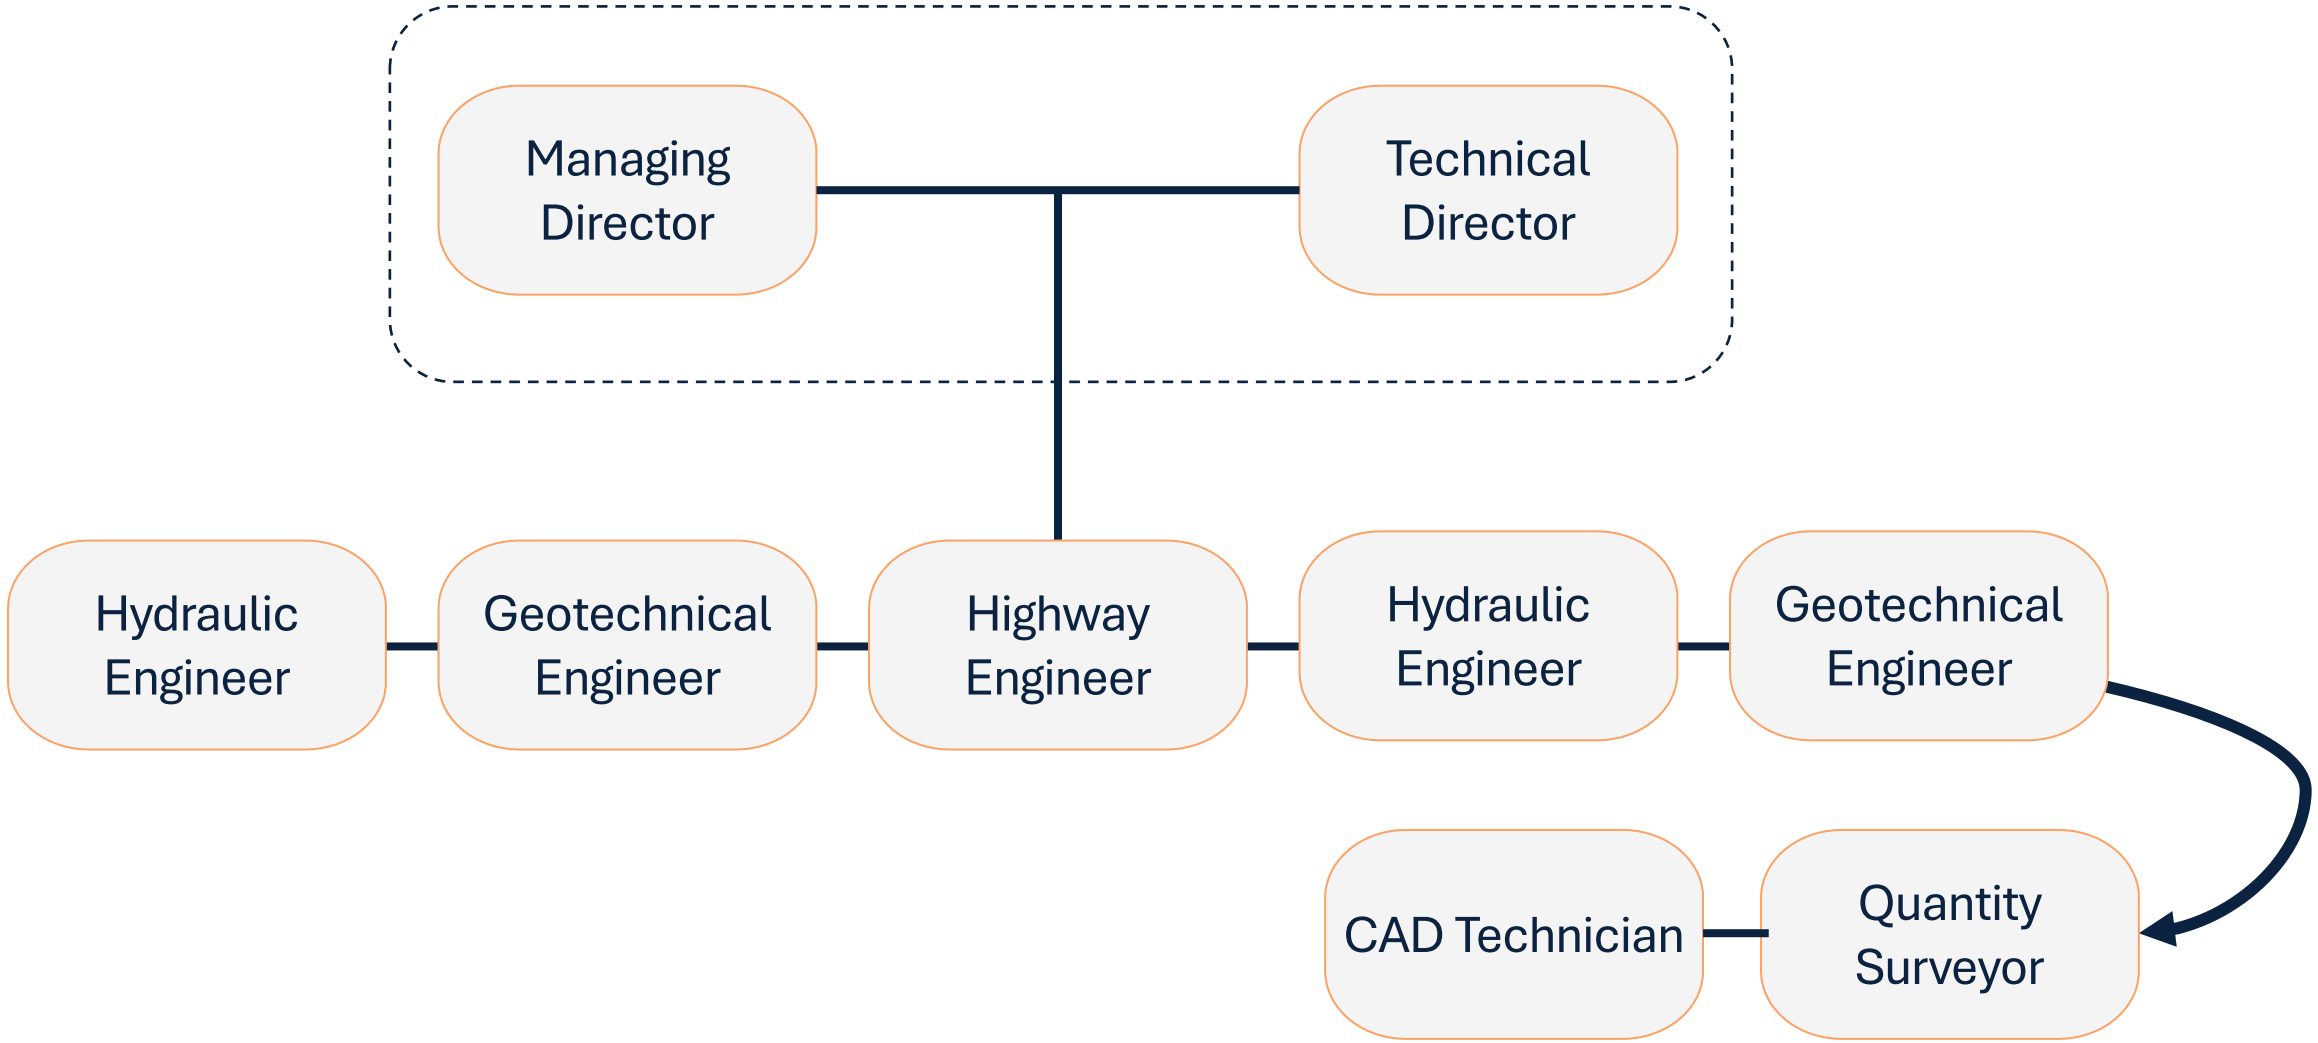
International Firms

PARTNERSHIP MODLES

Our intent is to function as an extension of your engineering team with transparent process and predictable delivery. We collaborate with structured models such as:

1. Project-based outsourcing (fixed scope and timeline)
2. Retainer-based engineering support (monthly capacity allocation)
3. Sub-consultancy agreements (defined work packages under a prime consultant)
4. Joint venture technical contribution

ORGANIZATIONAL STRUCTURE



FOUNDERS

HENOK A. MAMO

Co-Founder | Technical Director

Civil & Infrastructural Engineer
MSc in Civil Engineering (Geotechnical)

8+ major road projects | 300+ km Corridor design experience | Advanced expertise in Autodesk Civil 3D, corridor modeling, hydrology/hydraulics, and soil stabilization methods

NATNAEL G. MEKONNEN

Co-Founder | Managing Director

Civil Engineer | Business Strategist
MSc in Civil Engineering (Road & Transport), BA in Business Management

Consulted and Established more than six startups | leads commercial strategy, partnerships, and project delivery systems for the firm.

Let’s Build Infrastructure That Delivers.
